Is there any way we can have the actual RESRAD-BUILD model input files (\*.BLD) provided to us?

Stuart and Wayne,

This is the schedule that we will do our best to meet. After Dave, Jon and I complete our reviews, we will have an internal USACE call/discussion, followed by a call/discussion with you and then finally we will formalize everything in a Memorandum for Record (a draft and a final).

27 Jan - initial USACE work complete  
28 Jan - conference call with Hays, Rankins, and Clements to discuss findings  
29 Jan - conference call with EPA (Stuart and Wayne) to present/discuss USACE findings  
31 Jan - USACE draft MFR provided to EPA

Sound OK?

Julie

Hi Julie, how this analysis progress? Fred is back if we need to loop him into discussions on the MCNP ratios.

ORNL developed some revised MCNP room ratios to simulate just the floor being contaminated since that was one scenario of interest at Hunters Point. Fred had a method for using these post processing, but we should talk about that when he and I get back from vacation in January.

Julie -

Attached are the RESRAD BUILD Hunters Point files provided by the Navy. They include a memorandum prepared by Battelle describing the effort (the sole word file).

Stuart - Thanks.

Julie - Attached are the BPRG Hunters Point input and output files provided by the Navy. I will send the RESRAD BUILD files in a second email.

Please email or call with any questions

Hi Wayne, I talked with the Army Corps today about doing an evaluation to determine why the Navy RESRAD Build and EPA's BPRG runs have significant differences, both for fixed/3D and removable/dust. Can you provide to Julie and I with all of the EPA and Navy runs that you wanted evaluated? I am on annual leave this holiday season but am reachable by cell phone.
